As a result, Delivery Service customers without Daily Metering are required to limit their confirmed scheduled supply deliveries to **no more than the percentages set forth below** of the customer's Maximum Daily Volume (MDV).

Delivery Service customers with Daily Metering are required to limit their confirmed scheduled supply deliveries to **no more than the percentages set forth below** of their actual daily demand.

TRANSIT POINT

Daily Service Customers and/or Suppliers should adhere to the percentages set forth above for scheduled deliveries to CKY Pipeline Scheduling Points (PSP). Daily scheduled deliveries to the Transit Point (when available) WILL be included in the daily confirmed volume for purposes of determining compliance with these orders.

CHOICE

Small Volume Aggregation Service Marketers (aka Choice Marketers) should continue to deliver according to the Choice Daily Delivery Requirements contained in their Demand Curves. Daily scheduled deliveries to the Transit Point (when available) WILL be included in the daily confirmed volume for purposes of determining compliance with these orders.

Reason(s) for Notice: CKY's ability to accommodate the current level of imbalances between transportation customer supply and demand is impacted by CKY's obligation to adhere to the capacity limitations within their upstream pipeline and storage contracts.
